## EXPERIENCE

JavaScript, jQuery, Angular, IoT, GitHub, XAML, C#, C++, Java, Ruby on Rails. Learning React.js, HTML, CSS, SASS

### Microsoft

February 2017 – May 2017

#### Software Intern

- Workflow restricted access to coffee, users were required to use RFID cards to track consumption which improved inventory by providing data on inventory levels in real-time
- Using C# and XAML to develop a program that used sensors to control access to a coffee keg also known as kegerator lock
- Worked in a team of software engineers and designer to Deploy to a Raspberry Pi
- Researched requirements along with my team to define hardware design and electrical engineering scope
- Managed version control using Github for deployment to Demo staging server on Microsoft Azure
- Created scripts to store results to MySQLite including all sensor activity data

### Howard Development & Consulting

November 2016 – Present

#### Contract Developer

- Managed backend edits for WordPress themes including plugins, migrations, and updates
- Manage client support tickets with Zendesk ensuring 15 minute response time
- Worked to ensure WordPress became client friendly
- Performed monthly security and performance checks on client sites

### Resilient Coders

July 2017 – September 2017

#### Developer In Residence

- Teach Bootcamp students Web Development skills HTML, CSS, JavaScript/jQuery
- Mentor and QA students on their coding and project work

### Resilient Lab

September 2016 – February 2017

#### Web Developer

- Created websites and web applications for clients in JavaScript, Bootstrap, PHP, and WordPress
- Functioned as part of a team in execution and delivery of client work
- Built WordPress themes, Jekyll themes
- Worked with appreciation for Progressive Enhancement, following Separation of Concerns and using a responsive design
- Worked with team members and project lead following agile and scrum methodologies and related tools

## EDUCATION

### Resilient Coders Bootcamp

July 2016 – August 2016

#### Web Development Apprentice

- Practiced modern web design best practices, focused on fundamentals of Git, HTML, responsive CSS, and Javascript/jQuery
- Graduated first in class, earning the Resilient Coder's Leadership Award
